

Module 4

Standardized Decontamination Procedures

Name \_\_\_\_\_

Date \_\_\_\_\_

Agency \_\_\_\_\_

Circle the most correct answer:

1. Which group would have priority when performing Decon?
  - a. Rescued survivors
  - b. Task Force members with intact PPE and canines who are asymptomatic
  - c. Task Force members and canines who are ill, symptomatic, or have comprised PPE
  - d. Task Force members running low on air
2. Which statement is false?
  - a. Decon supervised by Haz Mat Manager
  - b. Decon position filled by any available personnel
  - c. All Task Force members receive basic decon training
  - d. Medical Specialist conduct triage
3. US&R teams use a \_\_\_\_\_ step process for decon.
  - a. 2
  - b. 4
  - c. 6
  - d. 8
4. Some post Decon considerations would be:
  - a. Medical evaluation
  - b. Rehabilitation and replacement clothing
  - c. Reports and exposure logs
  - d. All of the above
5. The types of decontamination are:
  - a. Field, Emergency, technical
  - b. Emergency, technical, surgical
  - c. Emergency, technical, field
  - d. Emergency, gross, technical
6. The portable water heater runs on which fuels?
  - a. Gasoline, diesel, aviation
  - b. Gasoline, fuel oil, mineral oil
  - c. Diesel, aviation, kerosene
  - d. Any fuel per the American Petroleum Institute

*Urban Search and Rescue in a Contaminated Environment*

7. The Merlin requires factory service every blank years?
  - a. 2
  - b. 1
  - c. 3
  - d. None
8. When choosing a site which of these is true?
  - a. Contamination situated downwind from the exclusion zone
  - b. Locate uphill, drain toward exclusion zone or to side
  - c. Small enough to keep clean from contamination
  - d. Place heaters downwind and downhill to help avoid
9. True or False, the EPA position on runoff states that you can avoid capturing waste in an emergent life safety situation?
10. In the four (4) steps of decontamination which step can be completed off site?
  - a. Decon wash and rinse
  - b. Gross Wash
  - c. Personal Hygiene
  - d. Remove outer PPE
11. A chemical and/or a physical process to remove and prevent the spread of a contaminant:
  - a. Decontamination
  - b. Contain
  - c. Salvage
  - d. Mop up
12. Who supervises the Decon corridor?
  - a. Task Force Leader
  - b. Hazmat Specialist
  - c. Contaminated member.
  - d. Hazmat Manager
13. The use of copious amounts of water in a rapid application due to medical need is?
  - a. Gross Decon
  - b. Technical Decon
  - c. Emergency Decon
  - d. Chemical Decon
14. Step three of the four step standard decon process is?
  - a. Remove outer protection
  - b. Gross decon
  - c. Wash and rinse
  - d. Personal hygiene shower
15. The US&R decontamination process is **primarily** used to protect?
  - a. Citizens
  - b. Task Force
  - c. Equipment
  - d. Victims

**Urban Search and Rescue in a Contaminated Environment**

16. Personnel exiting the Decon area should be checked with monitoring instruments by?
  - a. Hazardous Materials Specialist
  - b. Safety officer
  - c. Red Cross
  - d. Environmental and Protective Service
17. The waste water bladder used in decontamination will hold approximately \_\_\_\_\_ gallons?
  - a. 500-600
  - b. 200-300
  - c. 700-800
  - d. 400-700
18. What is the order to perform decontamination by priority
  - A. TF members and canines that are ill, symptomatic, or have compromised PPE
  - B. Rescues Survivors
  - C. TF Members with intact PPE and canines that are asymptomatic
    - a. A,B,C
    - b. C,B,A
    - c. B,A,C
    - d. C,A,B
19. Post Decontamination Monitoring includes?
  - a. Monitoring with instruments by Hazmat Specialists
  - b. Medical Evaluation
  - c. Reports and exposure log
  - d. All of the above
20. Ideally, the decon site is located \_\_\_\_\_ from the exclusion zone.
  - a. Downwind
  - b. Upwind
  - c. Downhill
  - d. 500 meters
